

FLOW SCHOOL: INTRODUCTORY

COURSE INFORMATION

This basic two day course starts with the fundamentals which focus on the physics of flow and concepts applicable to virtually any manufacturer's equipment. The next portion provides maintenance and engineering personnel with a basic understanding of numerous flow technologies and operating principles. Following this introduction, we proceed with in-depth material on magnetic and Coriolis flow meters. The class is a combination of classroom and hands-on training.

TOPICS COVERED

- Flow Basics and Advanced Flow Metering
- Differential Pressure Flow Measurement
- Coriolis Flow Meters
- Electromagnetic Flow Meters
- Vortex Flow Meters
- Ultrasonic Flow Meters

COST

\$1500.00 per person
Space is limited and registration is required
