

PRESSURE & TEMPERATURE SCHOOL

COURSE INFORMATION

This introductory course provides maintenance and engineering personnel with a basic understanding of numerous pressure and temperature technologies. Learn concepts applicable to virtually any manufacturer's equipment as well as the skills needed to set up and maintain such equipment. Introductions and lectures on the technologies will be followed with in-depth demonstrations and hands-on training exercises.

TOPICS COVERED

- Pressure Instrumentation – gauge, absolute, differential, and hydrostatic
- Temperature sensors and transmitters
- Calibration and pressure range selection

COST

\$1500.00 per person
Space is limited and registration is required
